**PERMANENTLY SOFT AND
GREEN NATURAL MOSS FOR
AMAZING INTERIOR MOSS
WALLS.**

EASY INSTALLATION

The natural Standard Moss Panel is particularly popular due to its light weight and uncomplicated installation on the wall. The moss sheets can easily be cut to size for mounting using standard tools. Ideally, they are stapled to a wooden substrate, although they can also be screwed to the substrate or glued to it directly.

**SURFACE
WOW**

Because of the lightweight (HDF) backboards we use, which can be bent in either direction, you can also create moss walls around rounded or arched surfaces such as pillars or corners. The only limit is your imagination.

STEP 1 PICK YOUR COLOUR

MOSS GREEN

Our Evergreen Moss Standard 100% genuine moss panels have been developed for fast and straightforward self-installation. The natural moss panels are suitable for flat, convex or concave mounting around objects or installation as a moss wall. Our Evergreen Moss Panels are specially preserved reindeer moss, fastened to flexible 380 x 580 mm panels. They are made of the same reindeer moss as our Evergreen Moss Premium product and don't need light, water or feeding.

APPLE GREEN

Panel Size

Evergreen Moss Standard: 380 x 580 mm boards. 5 panels covers 1.1m²

- 100% natural moss
- Natural & maintenance-free
- No light, watering or feeding required subject to recommended humidity of 40% to 60%
- Easy to mount
- Easy to combine multiple panels
- B1 fire resistance on request
- Up to 90% sound absorbent

FLEXIBLE INSTALLATION

Because of the lightweight (HDF) backboards we use (which can be bent in either direction), you can also create moss walls around rounded or arched surfaces such as pillars or corners. The only limit is your imagination.

EASY INSTALLATION

The moss boards can be stapled (for example, with an electric staple gun), screwed or glued directly onto a wooden substrate.

GREENHILL MOSS

THE FACTS

Whatever you're designing, from wall pictures to complete walls, Greenhill Moss Premium always gives you a green work of art. The green cushion moss is great for unusual wall, ceiling and object design. With their sound-absorbent properties, the moss pictures make a significant contribution towards well-being at home and in the workplace.

On request, we can also custom produce designs with Greenhill Moss Premium, using arched mounts, for example, to produce stunning 3D.

MATERIAL

Real cushion moss bonded to MDF backboard

DIMENSIONS

Standard dimensions: to customer specifications, custom dimensions on request, pieces can be combined to cover large areas.

COLOURS

Moss Green (standard)
Apple Green (option)

DESIGN

2D and 3D installations

APPLICATIONS

Wall and ceiling design, room dividing, furniture and object construction (indoor).

APPLICATION EXAMPLES

Office and living space design, exhibitions, hotels and shopfitting, wellness/relaxation rooms, hospitality, reception and conference rooms.

Technical Information

Thickness	Top Layer: Approx. 30mm to 60mm, on 10mm MDF backboard
Weight	Approx. 10kg to 12kg per m2 (moss incl. MDF backboard)
Fire Resistance	Panels: B1 certified on request, standard: B2
Acoustics	Sound absorbent
Installations	Self mounting is possible with the aid of our fixing rails and frame system. Individual sheets may, however, also be screwed or glued directly to the wall.
