LIGHTWEIGHT PANELS

Thanks to their lightweight construction, handling and installation are a breeze. No heavy lifting required—just effortless brilliance.

All sheets are available with or without self-adhesive. Our self-adhesive design panels are equipped with a strong adhesive layer – made of high-quality acrylates or synthetic rubber – on the back of the decorative panel and can thus be applied quickly and easily to non-absorbent substrates.

IMPACTFUL RESULTS

Despite their weightlessness, these panels deliver impact. Transform your space without the hassle of cumbersome materials.

CROOKED WALLS OR WRONG MEASUREMENT?

Our decorative panels can also be easily resized on site. Simply adjust design sheets with standard woodworking tools – for most design panels even a simple wallpaper knife is sufficient.
